

Safety Team Advisor Year End Report 2019-2020

Attended the fall Division meeting in Cleveland in September. Only 5 other regions had advisors there. Mike Husar (National Safety Advisor) presented a new Safety Team PowerPoint which was discussed at great length. The PowerPoint presentation was shared at our Regional fall meeting at Ski Brule. It covered the method of distribution for the new materials and supplies this year. When these kits became available, I emailed all of the Regional staff and each Patrol Representative. Each patroller could order up to two kits. This kits cost \$50.00 each for materials and shipping and handling.

During the year the Division advisor held several conference calls with the regions. When any new information can out from National or Division Safety Team I shared it on Facebook groups for the Region and Division. I did not receive any feedback or questions, from any patrols to date, about the kits or their use. National did send out a Survey Monkey to collect feedback on how the kits were used and to gather any suggestions. Feedback is still needed from those that purchased kits with how they used them and any suggestions for items included in future kits.

Your feedback is really needed. What should the kits contain - types of stickers, buffs, and /or other products?

Not sure how next year will be done as we move forward, and have not heard anything from Division Advisor or National.
